

## South Oxfordshire District Council

### Assessment of Five Year Housing Land Supply, May 2017

#### Policy requirement

1. The National Planning Policy Framework (NPPF) requires local planning authorities to assess and demonstrates a five year supply of deliverable housing sites. Specifically, paragraph 47 the NPPF states:

*“To boost significantly the supply of housing, local planning authorities should: Identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the planned supply and to ensure choice and competition in the market for land);”*

2. The recently published Planning Practice Guidance (PPG) provides further details on the assessment of five year housing land supply (Ref. ID: 3-033):

*“...local planning authorities should consider both the delivery of sites against the forecast trajectory and also the deliverability of all the sites in the five year supply.*

*Local Planning authorities should ensure that they carry out their annual assessment in a robust and timely fashion, based on up to date and sound evidence, taking into account the anticipated trajectory of housing delivery, and consideration of associated risks, and an assessment of the local delivery record. Such assessment, including the evidence used, should be realistic and made publicly available in an accessible format. Once published, such assessments should normally not need to be updated for a full twelve months unless significantly new evidence comes to light or the local authority wishes to update its assessment earlier.*

3. The demonstration of a robust five year supply of sites is a key material consideration when determining housing applications and appeals. As set out in paragraph 49 of the National Planning Policy Framework, a five year supply is also central to demonstrating that relevant policies for the supply of housing are up to date in applying the presumption in favour of sustainable development.
4. This report sets out South Oxfordshire District Council’s housing land supply position as at May 2017. In summary:

The District has 4.1 years of deliverable housing land supply

## Calculation of five year housing land requirement

### Annual requirement

5. In April 2014, the councils across Oxfordshire published a Strategic Housing Market assessment (SHMA), to help identify the need for housing across the housing market area of Oxfordshire and its sub-division for each of the authority areas.
6. The SHMA made recommendations in terms of a housing range that we should be planning for which recognised that the affordable housing evidence provided a basis for considering higher housing provision. This was presented in the form of a range which identifies a total need for between 14,500 and 16,500 homes for South Oxfordshire over the twenty-year period 2011-2031. This would equate to an annual provision of between 725-825 new homes.
7. The council are producing a new local plan to cover the years 2011-2033 and which reflects the latest evidence of housing need. The emerging Local Plan uses the midpoint of the recommended range in the SHMA as the basis upon which to plan for housing growth. This is considered to be an appropriate response to meeting our housing needs. Our intention is to publish the local plan for its final consultation in the autumn of 2017 and submit it to the secretary of state for examination by the end of 2017. The council's intention is to adopt the new local plan in mid 2018. In the meantime, it is appropriate to use the mid-point figure of 775 dwellings a year to calculate our supply.

### Dwelling Completions and Shortfall

8. The total net completions for the district, delivered from 1 April 2011 up to 31 March 2017 is 3,397 dwellings, this has been delivered as follows:

<b>Years:</b>	<b>2011/12</b>	<b>2012/13</b>	<b>2013/14</b>	<b>2014/15</b>	<b>2015/16</b>	<b>2016/17</b>
<b>Annual completions:</b>	508	475	484	600	608	722
<b>Cumulative completions:</b>	508	983	1,467	2,067	2,675	3,397
<b>Cumulative requirement:</b>	775	1,550	2,325	3,100	3,875	4,650
<b>Difference:</b>	267	567	858	1,033	1,200	1,253

*Table 1: Annual housing completions vs. requirement April 2011 – March 2017*

9. The difference between the cumulative completions and cumulative requirement to date is an under delivery of 1,253 homes since 2011.
10. Paragraph 47 of the NPPF requires an additional 5% buffer to be added to the requirement to ensure "choice and completion", but that where there is a persistent under delivery, a 20% buffer should apply.

11. Table 1 shows persistent under delivery and will therefore apply a 20% buffer to the requirement.

### Deliverability of Sites

12. In accordance with the NPPF and PPG, as detailed above, the supply of deliverable housing land in the District is considered to comprise of the following:
  - Planning permissions;
  - The council's resolutions to grant planning permission subject to the signing of a S106 agreement;
  - Site allocations in 'Made' Neighbourhood Development Plans;
  - Elderly peoples care homes (C2 uses); and
  - Sites that have gone through the Prior Approval Procedure including conversion of agricultural buildings to dwellings, conversion of offices to dwellings and conversion of retail (A1 or A2) to dwellings.

### Planning Permissions

13. For the purposes of housing land availability we categorise those sites with a net gain of 1-9 dwellings as small sites and those sites of 10 or more dwellings as large sites.
14. Sites that have planning permission are generally considered to be deliverable. In regards to large sites that have planning permission, those sites where it is known there is a realistic prospect of delivery within the five years are considered to contribute to the supply as the Council undertakes monitoring and regular dialogue with larger site developers and will amend the supply trajectory as appropriate.
15. A non-implementation rate of 10% has been applied to all small sites as the Council is aware that not every committed small site will necessarily be built out. The delivery of small sites is assumed to be over the next three years, as this is a reasonable timeframe for the delivery of small scale sites.

### Resolutions to Grant

16. Planning applications that have a council resolution to give planning permission subject to a S106 agreement being signed are determined as 'resolutions to grant'. These applications have progressed positively through the process with the proposal generally being considered acceptable by the Council and are ready to be formally granted permission, subject to the detail of planning requirements being confirmed in a S106 legal agreement. The Council has only included those sites that have 'resolution to grant' as deliverable where there is sufficient evidence of the likely progress of the site.

### Site Allocations

17. Most of the allocated sites in the adopted Core Strategy have been granted planning permission, or have a resolution to grant permission. Those that have a full permission have either started to be developed or been completed. The full supply table at Appendix A includes full details of each of the allocations from Core Strategy.
18. There are four adopted or 'made' neighbourhood development plans in the district. These are at Thame, Henley, Sonning Common and Woodcote. The allocations from these plans are all included in our overall list of deliverable sites but we do not expect them all to commence in the next five years see Appendix A for more detail.

### C2 Planning Permissions

19. Planning permissions and resolutions to grant for C2 uses have been included in the five year housing land supply. A non-implementation rate of 20% has been applied to all existing commitments as the Council is aware that not every committed site will necessarily be built out.

### Prior Approvals

20. The contribution towards the housing supply from the prior approval procedure has also been accounted for. The Prior Approval process enables the conversion of properties from either office use, agricultural buildings or retail use to dwellings.

### Housing Delivery

21. Where no site specific information is present, the following assumptions are made for the delivery of sites and their anticipated trajectory:

### Lead in times

22. Deliverable sites without planning permission and under 100 dwellings will have 1 year lead-in from planning consent to first house being completed. For sites over 100+ there will be an 18 months lead in period from planning consent to the first house being delivered.

### Build-out rates

23. Justified based on local circumstances and evidence including that provided by developers. Where no delivery trajectory developer update has been provided the following assumptions to be made: 25 dwellings in the first year and 50 dwellings per annum per developer. On sites which constitute parcels of larger developments already under construction a delivery rate of 50 dwellings in the first year has been assumed.

24. The full housing supply table is provided at Appendix A to this statement which sets out the housing trajectory for each site which contributes towards the five year supply.

### Five Year Housing Land Requirement

**Table 2 – Calculation of five year housing land requirement at April 2017**

	DWELLINGS	Notes
<b>Previous Delivery (2011/12 to 2016/17)</b>		
S Oxfordshire requirement = 775 x 6 years	4650	
Actual Delivery (2011/12 – 2016/17)	3397	
Shortfall	1253	
<b>Requirement (2017/18 to 2021/22)</b>		
S Oxfordshire requirement = 775 x 5 years	3875	
Including 5% NPPF Buffer	4069	
Including 20% NPPF Buffer	4650	
Adjusted from previous (+ shortfall)	5903	4650 + 1253
<b>Deliverable Supply (2017/18 to 2021/22)</b>		
Total supply (trajectory)	<b>4859</b>	
Dwellings on sites (10+) with permission	2788	
Dwellings on sites (10+) with resolution to grant permission	1294	
Dwellings on sites (0-9) with permission (x 0.9)	467	519 x 0.9
Allocated sites	260	

Therefore, the supply of deliverable dwellings (**4859**) against the requirement and the 20% buffer (5903) shows the following:

Number of years supply	4.1	<b>(4859 / 5903) * 5</b>
------------------------	-----	--------------------------
