Introduction

1. Andrea Pellegram MRTPI (the consultant) has been commissioned by Chinnor Parish Council to prepare a site assessment and recommendations for site allocation for the review of the Chinnor Neighbourhood Plan. The Chinnor Neighbourhood Plan was made in October 2017 and the review began in April 2018.
2. Evidence has been supplied to the consultant by the Parish Council and the steering group. This has been used in an independent assessment by the consultant based on evidence available on the local planning authority website and other web-based data sources. Every effort has been made to undertake the assessment in a fair and transparent manner based on this available evidence.

Why Chinnor needs to undertake a Housing Site Allocation review

3. In the closing stages of the preparation of Chinnor's Neighbourhood Plan (NDP), the December 2016 Ministerial Statement made provision that neighbourhood plans that allocated sites for housing were considered up to date when a three-year housing land supply could be demonstrated. The National Planning Policy Framework (2018) codifies the ministerial statement in para. 14 and states that a made neighbourhood plan that contains policies and allocations to meets its identified housing requirement is considered to be up to date when the local planning authority can demonstrate at least a three-year housing land supply and its housing delivery was at least 45% of that required over the previous three years. However, this provision only applies where the neighbourhood plan became part of the development plan two years or less before the date on which the decision is made.
4. On 12 September 2018, a ministerial statement was issued (HLWS924) which, in the light of the Government's commitment to the Oxfordshire Housing and Growth Deal, under NPPF para. 217, the Government agreed to planning freedoms and flexibilities. The Statement allowed that for the purposes of NPPF para. 11(d) and Footnote 7, only a three-year housing land supply would be required to be demonstrated. The Statement clarified that the policy flexibility did not apply to the Housing Delivery Test limb of footnote 7. This policy flexibility would be under review and would remain in effect until the adoption of the Joint Statutory Spatial Plan in each area, provided that the timescales agreed in the Housing Growth Deal were adhered to. South Oxfordshire District Council (SODC) was listed as a local planning authority where the Statement would apply.
5. The original NDP considered a number of potential sites for allocation. No selected sites were included in the 2017 made Chinnor NDP because the two preferred sites

(CHI 7 and CHI 8) plus one reserved site (CHI 20) had already been granted planning permission. As the NDP's preparation was nearing completion, and rather than delay submission for approval and referendum by adding selected development sites, it was decided to complete the plan without allocated sites. The aim then was to review the NDP following adoption with the objective of incorporating allocated sites, thus ensuring that the Chinnor NDP would be amended to keep up to date with changes in the planning system. This site assessment is in support of that aspiration. The recommendations in this report will provide evidence required to revise the Chinnor NDP housing policies.

6. Several positive meetings with SODC, Chinnor Parish Council and the Steering Group have now taken place, from late in 2017 to early 2019. A meeting with the consultant and assigned planning officer took place in April 2018 where the approach and methodology for the site review was agreed in principle.

Methodology

7. The National Planning Policy Framework (NPPF) was re-issued in July 2018 and updated in 2019.
8. NPPF Appendix 2 indicates that to be considered "deliverable", sites should be *available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. Sites that are not major development, and sites with detailed planning permission, should be considered deliverable unless permission expires, unless there is clear evidence that homes will not be delivered within five years (e.g. they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.*
9. The "Site Assessment for Neighbourhood Plans Toolkit"¹ states, accordingly, that the allocated sites must be: suitable, available, and achievable.

¹"Site Assessment for Neighbourhood Plans: A toolkit for neighbourhood planners", Locality, 2015, pages 11-14.

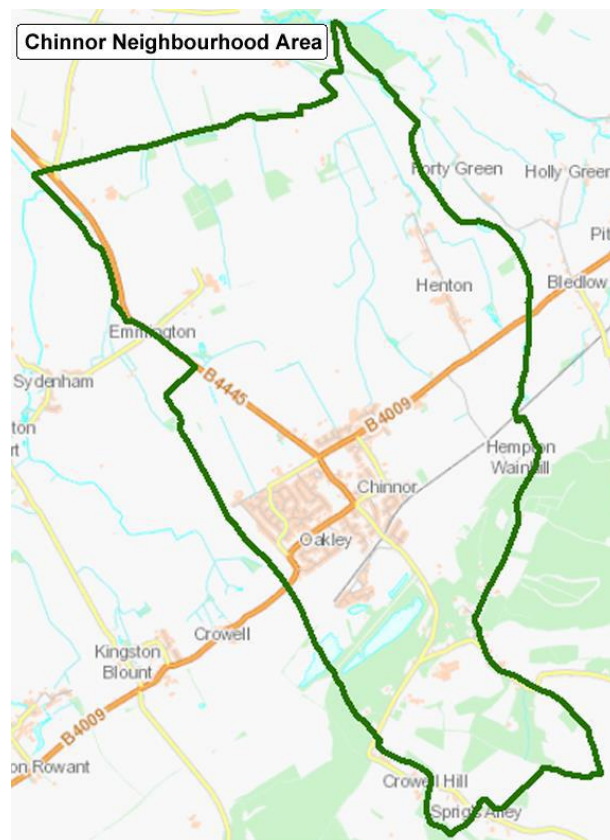

- a. A site is **suitable** if there are no insurmountable physical or environmental factors which would restrict development, or it has received planning permission.
 - b. A site is **available** if there is evidence that a landowner or developer is willing to sell or develop the site at a known point in the future, and within the plan period.
 - c. A site is **achievable** if there is evidence that it is economically viable and there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time.
10. For the purposes of this document, the following conclusions are drawn from the NPPF and the toolkit:
- a. The most deliverable sites will be those that have detailed planning permission for housing which is unexpired (“very deliverable”);
 - b. The second most deliverable sites will be those that have received outline planning permission for housing which is unexpired (“deliverable”).
 - c. The third most deliverable sites will be those that are:
 - i. Suitable in planning policy terms;
 - ii. Have been put forward by the landowner as available;
 - iii. Suitable for housing development in the next 5 years and therefore achievable.
11. The purpose of this report is to make recommendations on site allocations for the Chinnor NDP. The task will be to identify those sites that are most deliverable, whether they have received full or outline planning permission and whether further sites should be allocated.

Planning policy context

12. Chinnor parish lies within South Oxfordshire District. The Local Development Plan consists of the following:
- The South Oxfordshire Local Plan 2011 Saved Policies, 2006, (Local Plan)
 - The South Oxfordshire Core Strategy, December 2012 (Core Strategy)
 - The Chinnor Neighbourhood Plan (October 2017)

13. The South Oxfordshire Local Plan 2011 – 2034, Second Publication Version, January 2019 (the emerging Local Plan) is of relevance to this report but it bears limited weight. However, the emerging Local Plan is based on sound planning evidence that is relevant to this site assessment and this will be considered alongside the planning history of the parish since 2011.
14. A full review of policy is set out in **Appendix 1** which also suggests appropriate assessment criteria, and focuses on the following topics:
 - Sustainable transport
 - Design
 - AONB and landscape
 - Climate Change
 - Natural Environment
 - Historic Environment
 - Community Facilities
15. The site assessment is for the Chinnor NDP area, set out in **Figure 1**.

Figure 1: Chinnor NDP area

16. The policy review in Appendix 1 is used to identify criteria to assess individual sites. A colour coding scheme will be used as follows:

	The development will not be able to fully address the provisions of the policy or objective.
	The development does not meet the provisions of the policy or objective, but mitigation measures might be able to overcome the harm that might be caused.
	The development meets the provisions of the policy or objective.

Strategic housing allocation

17. The NPPF makes it clear that local plans are the key to delivering sustainable development² and neighbourhood plans should be aligned with the strategic needs and priorities of the wider local area³. The NPPF requires local planning authorities to determine the minimum number of houses needed by using the standard method in national planning guidance⁴. Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land assessment⁵. Strategic policy-making authorities should, as a minimum, provide for objectively assessed needs for housing⁶. Neighbourhood planning groups should also consider the opportunities for allocating small and medium-sized sites suitable for housing in their area⁷.
18. Core strategy CSS1 identifies Chinnor as a larger village that will be supported and enhanced as a service centre. Strategic housing allocations are focused around Didcot and the remainder of the district is required to provide an additional 2,884 homes. Chinnor, as a larger village, is identified in para. 7.17 as one of the villages offering the most services and with the ability to act as local centres as part of the network of settlements.

² NPPF, para. 11.

³ NPPF, para. 13.

⁴ NPPF, para. 60

⁵ NPPF, para. 67

⁶ NPPF, para. 11b.

⁷ NPPF, para. 69

19. Saved Local Plan policy RUR11 identifies the former Chinnor Cement Works and the housing portion of the allocation has been delivered.

The emerging Local Plan (January 2018)

20. The emerging Local Plan (second publication version January 2019) influences the policy context for the review of the Chinnor neighbourhood plan. Though it can only be given limited weight, the Saved Policies and Core Strategy are now out of date, or nearly out of date. The emerging Local Plan has been prepared to conform to the 2018 version of the NPPF and takes critical factors such as the Oxfordshire Growth Deal into account. As such, it provides valuable context for the site allocation and review of the neighbourhood plan.
21. Emerging Local Plan policy STRAT 1 seeks to ensure that development will support and enhance the role of Chinnor as a local service centre. STRAT 2 sets out the overall housing requirement for the district, taking account of the need to provide housing for Oxford and the Growth deal as a total of 22,775 over the plan period, or 775 homes (South Oxfordshire requirement) and 495 homes (contribution to the Growth Deal requirement) per annum. This is considerably more than anticipated in the Core Strategy.
22. Table 5b reviews housing allocations made by neighbourhood plans in the district and identifies that in the current Chinnor plan, no housing has been allocated.
23. The emerging Local Plan proposes the provision of 15% growth in larger villages.⁸ The supporting text states in para. 5.19:

Development in larger villages should be proportional, appropriate and dependent on existing infrastructure. It is considered that the most appropriate mechanism for delivering housing in larger villages is by preparing a Neighbourhood Development Plan and allocating sites.

24. The emerging Local Plan goes on to state in para. 5.20:

This level of growth will support local services and facilities and result in a sustainable and balanced distribution of development. Where larger villages are in the process of preparing a Neighbourhood Development Plan, the delivery of the houses allocated to these villages should be provided for by the Neighbourhood

⁸ South Oxfordshire Local Plan 2011-2034 JANUARY 2019, para. 5.18.

Development Plan. This enables communities to have their say on where development in their area will go.

25. The emerging Local Plan therefore sets the expectation that neighbourhood plans will allocate sufficient housing land to meet the identified need for a 15% increase from the April 2011 baseline. This is clarified in para. 5.25.
26. Emerging Local Plan para. 5.21 is relevant to Chinnor where a neighbourhood plan has been prepared but no housing has been allocated:

Where a larger village already has an adopted Neighbourhood Development Plan which does not provide for their level of allocated housing development, this will need to be reviewed within the specified timeframe as set out in Policy H4.

27. Policy H4 requires allocations to be made within 12 months of the adoption of the Local Plan.
28. Para. 5.28 of the emerging Local Plan acknowledges that allowed appeals in Chinnor have already enabled this larger village to achieve its 15% growth target but suggests that the Chinnor community may wish to consider safeguarding sites that have been given permission to benefit from the full weight of their NDP and to provide them with a robust baseline for monitoring.

Review of other evidence

29. The local planning authority has produced a significant body of evidence in support of the emerging Local Plan. This evidence will be reviewed here as relevant to site selection.

Brownfield Register

30. One site was identified in Chinnor as 40 Oakley Road. Under (P16/54085/PDO) in respect of a change of use from offices to form 14 apartments and under (P16/S41117/FUL for planning permission to construct 6 apartments in altered roof were approved. This is referred to as site Ref. 359 on the SHELAA, discussed below. South Oxfordshire District Council Strategic Housing and Economic Land Availability Assessment October 2017 (SHELAA).
31. The South Oxfordshire District Council Strategic Housing and Economic Land Availability Assessment (SHELAA) is the most up to date assessment of housing land availability for Chinnor. It is therefore important that the site allocation considers this evidence in detail. If it is not used as the basis of the allocation, the reviewed Neighbourhood Plan might be subject to challenge.

32. Appendix A of the SHELAA is a summary of sites assessed. The conclusions for Chinnor are reproduced in **Table 1** which shows the sites that are currently available (i.e. not built out or under construction) or not put forward as housing sites. The sites that have been assessed in the SHELAA as being suitable, available and achievable are highlighted in grey in the box containing the site reference in **Table 1**.

Table 1: Chinnor sites listed in SHELAA, Appendix 1

Site ref.	Site name	Suitable	Available	Achievable
37	Land at lower Icknield Way (2)	yes	no	no
42	46 Lower Icknield Way	yes	yes	yes
359	40 Oakley Road	yes	no	no
805	Land north of Lower Icknield Way	yes	no	no
808	Land west of Mill Lane Community Primary School	yes	yes	yes
842	Land at Golden Hills	yes	yes	yes
896	Land south of Greenwood Avenue (1)	yes	yes	yes
898	Land south of Lower Icknield Way	yes	yes	yes
900	Land at rear of 53/55 Oakley Lane	yes	no	no
901	Land off Crowell Road	yes	yes	yes
905	Land east of Crowell Road	yes	yes	yes
959	Land south of Doveleat	yes	yes	yes
963	Land adjoining former Chinnor Garden Centre	yes	yes	yes
996	Land south of Greenwood Avenue (2)	yes	yes	yes
1004	Chalkpit Lane	yes	yes	yes
1066	Land adjoining 54 Lower Icknield Way	yes	yes	yes
1097	Land north of Lower Icknield Way (4)	yes	yes	yes
1161	Land adjacent 7 Emmington, Chinnor	no	yes	no
1100	Land north of Lower Ickneild Way (3)	yes	yes	yes
1175	Land at New Farm	yes	yes	yes
1203	Land adjacent to junction at Oakley Land and Lower Icknield Way	yes	yes	yes
1204	Land to rear of Middle Farm	yes	yes	yes
1206	Land north of Malyns Close	yes	no	no
1207	Area to north of Leyburne Gardens	yes	no	no
1208	Land north of Elderdene	yes	no	no
1209	Land north Lower Icknield Way, Chinnor	no	yes	no
1210	Land south of Lower Icknield Way	yes	yes	yes
1211	Land east of High Street (1)	yes	yes	yes

1212	Land east of High Street (2)	yes	no	no
1213	Land north of Hill Farm Court	yes	no	no
1214	Land east of Wykeham Rise	yes	no	no
1361	Land to rear of Lower Farm	yes	no	no
1362	Land off Golden Hills	yes	no	no

33. The **sites highlighted in grey** in Table 1 are the most likely to be suitable for allocation in the Chinnor NDP. However, the sites have not been assessed in sufficient detail in the SHELAA to determine their overall suitability for allocation in the reviewed Chinnor Neighbourhood Plan, for instance when assessed against the criteria identified in the Planning Policy Context section in Appendix 1 of this report.
34. The SHELAA stated:
- 5.4.4 Some sites were assessed to have physical constraints, e.g. presence of ecological designations, or scheduled monuments. These in themselves do not necessarily make the sites unsuitable for development. However, these limitations have been factored into the indicative yields. Other factors (such as areas of archaeological interest, listed assets on site, or areas of ground contamination or instability) have been flagged in the assessment but do not automatically make a site unsuitable or reduce the yield because there could conceivably be ways to overcome these constraints.
35. This indicates that it is appropriate to consider the sites highlighted in grey in more detail. The SHELAA sites that are suitable, available and achievable are shown in **Figure 2**.

Figure 2: SHELAA sites that are suitable, available and achievable (grey)

Source: SODC SHELAA October 2017

Housing land supply

36. The planning authority issued its Housing Land Supply Statement for South Oxfordshire District Council (April 2018). This concluded that there is a 5.4-year housing land supply.

Planning History

Housing target 2011 to 2033 for Chinnor

37. The plan period for the Core Strategy is 2012 to 2027 and the plan period for the Emerging Local Plan is 2011 to 2034. The 2017 Made Chinnor NDP covers the period 2011 to 2033⁹. This site assessment will use the period April 2011 to 2034 accordingly.
38. The Chinnor NDP states in para 2.15 that there were 2389 dwellings in 2011.
39. The emerging Local Plan expects a 15% increase in this number, i.e. the provision of an additional 358 houses before 2034.

Review of planning applications

40. This site assessment was prepared in September 2018 and updated in July 2019. There have been several planning applications in the parish since April 2011 and since the SHELAA has been prepared.
41. The deliverable SHELAA sites (grey highlighted in Table 1) all appear at this stage in the assessment to be potential candidates for allocation. It is therefore prudent to consider the planning history of each to understand if and how they might be available.
42. **Appendix 2** of this report considers the planning history of all the deliverable SHELAA sites. Appendix 2 is summarised in **Table 2** which shows the outcome of the planning history. Those sites that have received planning permission for housing or that were allowed on appeal are highlighted in orange. Two applications were granted permission as a factory and a care home and are no longer considered to be available, highlighted in grey.

⁹ Chinnor NDP, para. 1.8.

Table 2: planning outcomes for potential sites (orange shading denotes consent for housing)

Site ref.	Site name	Planning history (housing applications only)
42	46 Lower Icknield Way	14 dwellings dismissed
359	40 Oakley Road	6 dwellings started
808	Land west of Mill Lane Community Primary School	78 dwellings permitted
842	Land at Golden Hills	10 dwellings withdrawn
896	Land south of Greenwood Avenue (1)	140 dwellings allowed
898	Land south of Lower Icknield Way	No housing applications
901	Land off Crowell Road	54 dwellings appeal in progress
905	Land east of Crowell Road	120 dwellings allowed
959	Land south of Doveleat	51 dwellings withdrawn
963	Land adjoining former Chinnor Garden Centre	Planning permission granted for factory
996	Land south of Greenwood Avenue (2)	80 dwellings allowed
1004	Chalkpit Lane	60 bed care home permitted and 21 dwellings approved and completed
1066	Land adjoining 54 Lower Ickneild Way	10-14 dwellings refused
1097	Land north of Lower Icknield Way (4)	89 dwellings allowed
1100	Land north of Lower Ickneild Way (3)	60 dwellings pending decision
1175	Land at New Farm	10 dwellings withdrawn
1203	Land adjacent to junction at Oakley Lane and Lower Icknield Way	No application history
1204	Land to rear of Middle Farm	No application history
1210	Land south of Lower Icknield Way	No application history
1211	Land east of High Street (1)	No housing applications

43. **Appendix 2** of this report shows all planning permissions for housing between April 2011 and January 2019. It shows that over this period, there have been 224 “infill” permissions. It also shows that there have been 842 dwellings permitted in major schemes. In total, 926 houses were permitted.
44. Chinnor is required by emerging Local Plan policy and adopted Core Strategy policy to seek to achieve a 15% increase in housing from the 2011 baseline. The 2011

baseline is 2389 houses and a 15% increase is 358 houses. The actual permissions to date are 926 houses which represents an increase of 39% over the 2011 base.

45. Chinnor has therefore demonstrated that it has met its housing requirement.

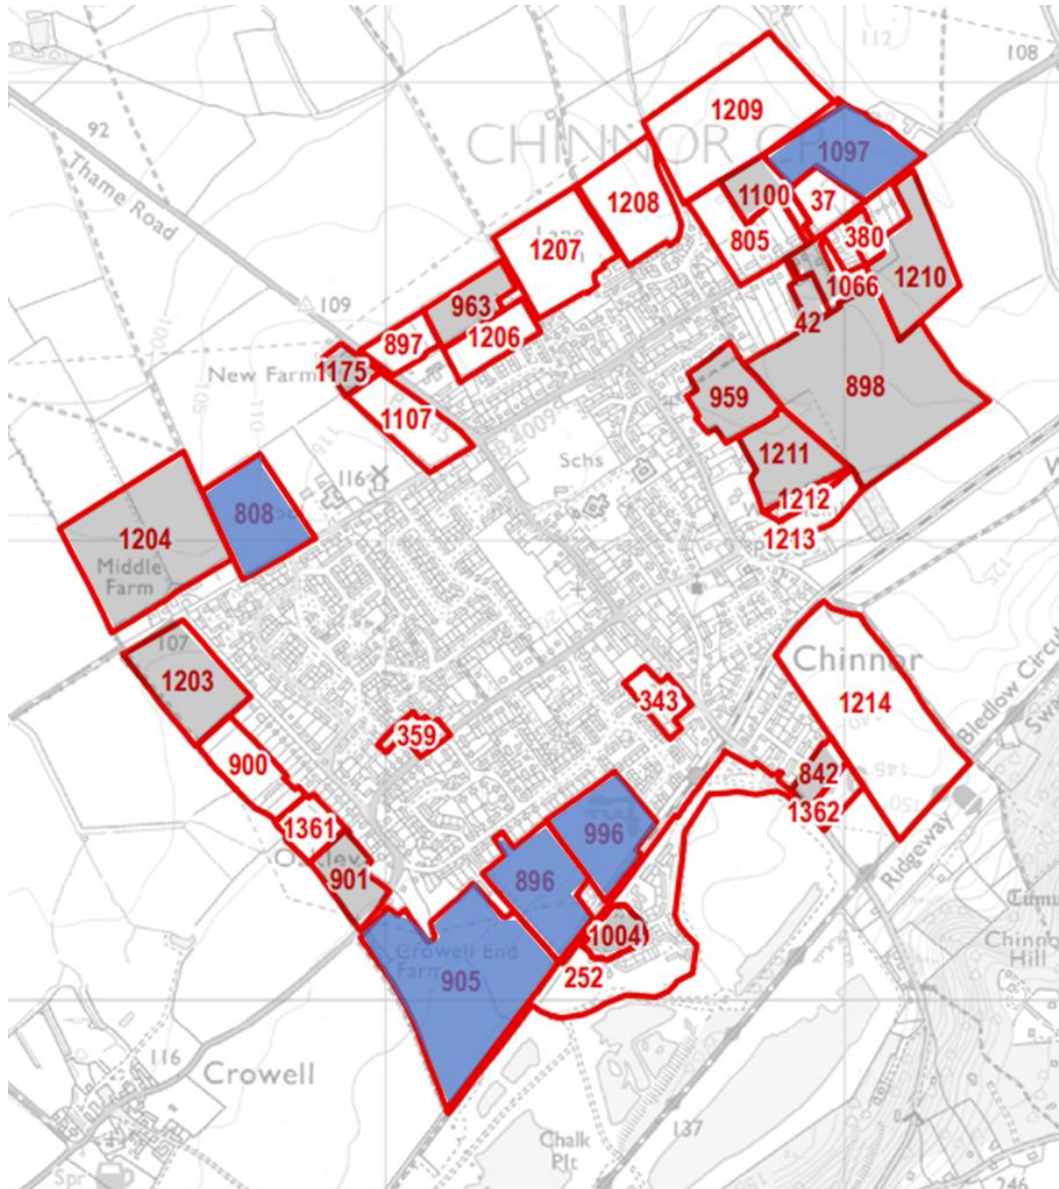

Site assessment and conclusion

46. Para 9a-b of this document states that the most deliverable sites will be those that have detailed planning permission for housing which is unexpired (“very deliverable”); The second most deliverable sites will be those that have received outline planning permission for housing which is unexpired (“deliverable”). Where sites have either full or outline planning permission for housing development, they are marked “green” in the assessment in Appendix 3.
47. Table 1 of this document identifies sites that would fit those criteria.
48. These sites are assessed using the methodology described in **Appendix 1** and are shown in **Appendix 3**. The following sites were deemed to be acceptable in principle to be allocated in the Chinnor NDP: SHELAA sites 808, 896, 905, 996, and 1097. Though some of the sites were subject to policy constraints such as archaeology and flooding, overall, the sites were suitable for development with appropriate mitigation. In addition, as stated above, they have already been consented as housing development sites.
49. It is the responsibility of a developer to make proper provision for surface water drainage to ground, water courses or surface water sewer. It must not be allowed to drain to the foul sewer, as this is the major contributor to sewer flooding. Thames Water has supplied information regarding waste and waste water which is set out in **Appendix 4**.
50. Some of these sites were previously identified in the evidence gathering for the made NDP. Where sites were previously mentioned, their site reference will be included for reasons of clarification.

It is recommended that the following sites (shown in Figure 3) are allocated for housing in the reviewed Chinnor NDP:

NDP reference	SHELAA reference	Site address	Number of dwellings
Chi7	808	Land west of Mill Lane Community Primary School	78 dwellings
Chi21	896	Land South of Greenwood Avenue (1)	140 dwellings
Chi1	905	Land east of Crowell Road	120 dwellings
Chi20	996	Land south of Greenwood Avenue (2)	80 dwellings
Chi13	1097	Land north of Lower Icknield Way (4)	89 dwellings

Figure 3: Sites proposed for allocation in the Chinnor NDP

Key: sites in blue are identified for allocation. The reference number on the map is that used in the SHELAA (2017)

51. The assessment in this report has identified sites to be allocated in the reviewed Chinnor Neighbourhood Development Plan.

Appendix 1: Policy basis for assessment criteria

Sustainable transport

52. Core strategy policy CSM1 supports measures which enable modal shift to public transport, cycling and walking, manage parking and encourage the use of sustainable modes of transport.
53. Emerging local plan policy TRANS2 follows CSM1 and seeks to ensure that new development is designed to encourage walking and cycling, not only within the development, but also to nearby facilities. Developments should adopt an approach to the provision and management of car parking aimed at improving the attraction of village centres.
54. Emerging local plan policy TRANS5 states that development proposals should provide for safe and convenient access for all users to the highway network; and provide safe and convenient routes for cyclists and pedestrians. New development should be accessible by public transport and have a safe walking route to nearby bus stops or new bus stops. Furthermore, new development should be served by an adequate road network which can accommodate traffic without creating traffic hazards or damage to the environment. Parking should usually be in accordance with Oxfordshire county council parking standards.
55. The transport criteria for the site assessment will be as follows:

	The development will not be able to fully have safe and secure access to the highway network and is unlikely to be able to provide suitable sustainable transport links.
	The development will not be able to have fully safe and secure access to the highway network without significant infrastructure provision including for sustainable transport links.
	The development is likely to have safe and secure access to the highway network.

56. A key measure of sustainability is the ability to avoid using the car when making regular local journeys. New housing is likely to have young children residents, and most people regularly need to access the post office and local shops. Older people will of course also walk and cycle. For the purposes of comparison, it is a useful

exercise to consider the distance of individual sites from the post office (which is near to local shops) and the two primary schools by road (which are generators of traffic at start and finish times). If the mid-point of each site on the main road network is taken at the starting point, it is possible using Bing maps to measure road distance (i.e. a “cycle route” but excluding informal paths and cut-throughs) between each site and post office and schools.

57. The approximate cycle journey lengths along roads in metres from each site is shown in **Table 4**. Assuming that all parents are lucky enough to be allocated spaces at the nearest primary school, the “**cycle-ability**” of each site can be approximated, shown in the final column of the Table. NPPF para. 104 states that planning policies for larger scale sites should “minimise the number and length of journeys needed for employment, shopping, leisure, education and other activities.”
58. If it is assumed that one mile (or 1.6 km) is the maximum distance that parents and children are willing to walk for a total journey to the post office or to school, (or 0.8 km for one way), it is possible to identify sites that are accessible by foot. If this notional distance is doubled to one mile (1.6 km) for one-way, it is possible to identify sites that are accessible by cycle by parents and children.
59. The results in Table 4 have been used in the individual site assessments in Appendix 3. The table shows relative distances as an indication of the accessibility (distance between the site entrance and either a primary school or post office).

Table 4: Distances (one way) between mid-point road access and key Chinnor destinations (metres)

Site ref.	Site name (from)	To Post Office	To Mill Lane Primary School	To St Andrew's Primary School	Distance to post office + nearest school
808	Land west of Mill Lane Community Primary School	1285	150	820	1435
905	Land east of Crowell Road	1220	1005	1080	2225
996	Land south of Greenwood Avenue (2)	820	1015	710	1530
1004	Chalkpit Lane	1240	1190	1230	2430
1097	Land north of Lower Icknield Way (4)	1280	1385	1385	2665

359	40 Oakley Road	840	800	760	1600
42	46 Lower Icknield Way	940	1190	1050	1990
842	Land at Golden Hills	740	1390	730	1470
896	Land south of Greenwood Avenue (1)	1020	1200	870	1890
898	Land south of Lower Icknield Way	300	1141	790	1090
901	Land off Crowell Road	1300	1060	1150	2360
959	Land south of Doveleat	400	1000	820	1400
1066	Land adjoining 54 Lower Icknield Way	1040	1140	1045	2085
1100	Land north of Lower Icknield Way (3)	960	1130	1110	2070
1175	Land at New Farm	1190	670	640	1830
1203	Land adjacent to junction at Oakley Lane and Lower Icknield Way	1540	530	1200	2070
1204	Land to rear of Middle Farm	1620	490	1170	2110
1210	Land south of Lower Icknield Way	1200	1450	1410	2610
1211	Land east of High Street (1)	170	1043	660	830

AONB and landscape

60. Policy CSEN1 protects the district's landscape from harm. Where development is acceptable in principle, measures will be sought to integrate it into the landscape character of the area. (ii) High priority will be given to conservation and enhancement of the Chilterns Area of Outstanding Natural Beauty (AONB) and planning decisions will have regard to its setting.
61. Emerging local plan policy ENV1 also seeks to protect the district's landscape, countryside and rural areas against inappropriate development including the AONB and features such as trees (including individual trees, groups of trees and woodlands), hedgerows.
62. The landscape criteria for the site assessment will be as follows:

	The development will cause unacceptable harm to the setting of the Chilterns AONB.
	The development is likely to cause a measure of harm to the setting of the Chilterns AONB or the surrounding countryside features such as trees or groups of trees and hedgerows.
	The development is likely to have a minimal impact on landscape and the setting of the Chilterns AONB.

Climate Change

63. Emerging local plan policy EP4 seeks to reduce the risk and impact of flooding by directing new development to areas with the lowest probability of flooding and where located in zones 2 and 3 may be required to prepare a strategic flood risk assessment and manage any potential flooding issues.

- | | |
|--|--|
| | The development will lie in flood zones 2 or 3 and should be avoided whilst other sites are available. |
| | The development may be subject to flooding, or part of the site is in flood zone 2 or 3, and is therefore constrained. |
| | The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1). |

65. The core strategy policy CSG1 states that the net loss of green infrastructure including biodiversity through development proposals will be avoided.
66. Emerging local plan policy ENV3 sets out that development proposals which would result in a net loss of biodiversity will only be considered if they can demonstrate that alternatives which avoid impacts on biodiversity have been fully explored or they must provide adequate mitigation measures to achieve a net gain of biodiversity.
67. Emerging local plan policy ENV5 states that new development should avoid the loss, fragmentation, severance or a negative impact on the function of green infrastructure.
68. The made Chinnor NDP precludes development on identified local green spaces in policy CH GP1. Policy CH GP2 protects existing hedgerows, flora, fauna and other natural habitats of significance. However, no specific habitats of significance were identified in the NDP.
69. The natural environment criteria for the site assessment will be as follows:

	The development result in an unacceptable loss of green infrastructure, particularly in relation to Chinnor NDP policies GP1 and GP2.
	The development will put green infrastructure at risk or will result in the loss of green infrastructure, particularly in relation to Chinnor NDP policies GP1 and GP2, and a mitigation strategy will be required to avoid harm where possible.

The development is unlikely to result in the loss of green infrastructure.

Historic Environment

70. Core policy CSQ3 states that planning permission will be granted for new development that responds positively to and respects the character of the site and its surroundings, particularly the historic significance and heritage values of the historic environment provides and/or links into green infrastructure where available.
71. Core policy CSEN3 states that the district's designated historic heritage assets, both above and below ground such as listed buildings and conservation areas; and their settings will be conserved and enhanced for their historic significance and their important contribution to local distinctiveness, character and sense of place.
72. Emerging local plan policy ENV6 states that new development that will affect heritage assets (designated and non-designated) must conserve or enhance the significance of the heritage asset and its setting.
73. Emerging local plan policy ENV7 states that proposals affecting the setting of a listed building must conserve or enhance the heritage significance and setting and be sympathetic to the listed building and its setting in terms of its setting. Policy ENV8 states that development proposals within or affecting the setting of a conservation area must conserve or enhance its special interest, character, setting and appearance.
74. There are two conservation areas in Chinnor: The Chinnor Conservation Area and the Oakley Conservation Area. These are shown in Figure 4.

Figure 4: Chinnor conservation areas

75. There are several listed buildings in Chinnor as shown in **Figure 5**.

Figure 5: Listed buildings

Source: MAGIC map

76. The natural environment criteria for the site assessment will be as follows:

	The development result in unacceptable harm to the setting of a listed building or conservation area.
	The development will cause harm to the setting of a listed building or conservation area and a mitigation strategy will be required to avoid harm where possible.
	The development is unlikely to have a negative impact on a conservation area or listed building.

Community Facilities

77. Chinnor NDP policy CH CF1 protects community facilities listed in the policy from redevelopment and requires their replacement as an exception. Loss of the community facilities can only be achieved when it has been satisfactorily

demonstrated that it is not economically viable or feasible to retain the existing community facility. These are listed in Figure 6.

Figure 6: Community Facilities listed in NDP policy CH CF1

Source: Chinnor NDP page 61.

78. The community infrastructure criteria for the site assessment will be as follows:

	The development result in the loss of necessary community infrastructure that is unlikely to be replaced.
	The development will result in the loss of necessary community infrastructure and replacement will be required.
	The development is unlikely to result in the loss of community infrastructure.

APPENDIX 2: PLANNING HISTORY FOR THE SHELAA (DELIVERABLE) SITES IN CHINNOR

Site ref.	Site name	Planning history
42	46 Lower Icknield Way	P16/S3184/FUL the Barn House 46 Lower Icknield Way CHINNOR OX39 4EB Proposed erection of 14 dwellings, with widening of existing access to Lower Icknield Way and landscaping (as amended by drawings received 21 February 2017) APP/Q3115/W/17/3179647 DISMISSED

Sites for allocation

Site reference	808
Address	Land west of Mill Lane Community Primary School
Site area	3.61 ha
Planning status	Permitted, construction commenced
SHEELA comment	Site is agricultural and undeveloped.
Estimated housing yield	78
Sustainable Transport	The site has access onto Mill Lane.
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	A small portion of the site (3%) is in Flood Zone 3.
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1. Mature tree screening at edge of site would need to be preserved under GP2.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4.
Conclusion	This site scores favourably overall. Very deliverable.

Site reference	896
Address	Land south of Greenwood Avenue (1)
Site area	3.89 ha (SHELAA)
Planning status	Appeal allowed.
SHEELA comment	The site is largely open, although there is some existing development. Some or all of the site is bounded by fencing, wall or hoarding. Application was refused as would result in the loss of this intervening green space, consolidate the built up appearance of the area and diminish the rural, green and open character of the locality.
Estimated housing yield	87
Sustainable Transport	The site has access to Greenwood Avenue.
AONB and landscape	Refusal for P16/S3284/O determined that loss of intervening green space between two permitted development would have a harmful impact on the character and appearance of the area.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	This proposal was allowed at appeal and therefore, despite constraints identified, it is very deliverable.

Site reference	905
Address	Land east of Crowell Road
Site area	10.11 ha
Planning status	Allowed, construction commenced
SHEELA comment	Open site with some development.
Estimated housing yield	120
Sustainable Transport	The site has access onto the B4009.
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1. . Mature tree screening at edge of site would need to be preserved under GP2
Historic Environment	5% of site within an area of known archaeological interest.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	There are some potential development constraints but they do not outweigh the overall acceptability of the site for allocation. Very deliverable.

Site reference	996
Address	Land south of Greenwood Avenue (2)
Site area	3.46
Planning status	Allowed, construction commenced
SHEELA comment	Agricultural and undeveloped.
Estimated housing yield	80
Sustainable Transport	The site has access onto Greenwood Avenue.
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	This site scores favourably overall. Very deliverable.

Site reference	1097
Address	Land north of Lower Icknield Way (4)
Site area	3.99 ha
Planning status	Allowed, outline permission.
SHEELA comment	Agricultural and undeveloped.
Estimated housing yield	89
Sustainable Transport	The site has access onto the B4009.
AONB and landscape	Views from the AONB of the site might cause harm to the setting of the AONB and would need to be managed.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	There are some potential development constraints but they do not outweigh the overall acceptability of the site for allocation. Deliverable.

Appendix 3: site assessment proformas

Sites not for allocation

Site reference	359
Address	40 Oakley Road
Site area	Information not available
Planning status	Permitted
SHEELA comment	Brownfield site
Estimated housing yield	Not known
Sustainable Transport	The site has road access.
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	This site scores favourably overall. However, it is relatively small and is currently in a commercial use. NDP policy CH B1 seeks to protect existing employment uses and resists change of use. It may be prudent to retain this site for employment purposes while there are other sites available. Very deliverable.

Site reference	42
Address	46 Lower Icknield Way
Site area	Site size (ha) 0.58
Planning status	Dismissed.
SHEELA comment	
Estimated housing yield	14 (SHELAA)
Sustainable Transport	There is an existing access that appears to be able to link to the B4009 via a private access road.
AONB and landscape	The site is within the setting of the AONB and tree preservation orders TPO (17S27) covers part of the eastern side of the site.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	This site is relatively small, yielding only 14 houses, and has a number of constraints such as being within the setting of the AONB and tree preservation orders. These issues could be overcome, but to do so would probably reduce the developable area, thus reducing the yield further. The reasons for refusal were that the proposal was considered to be harmful to the character and appearance of the AONB, had an adverse impact upon protected trees, would harm local amenity and did not make sufficient provision for affordable housing.

Site reference	842
Address	Land at Golden Hills
Site area	0.86 ha (SHELAA)
Planning status	Withdrawn.
SHEELA comment	
Estimated housing yield	Yield housing 21 (SHELAA)
Sustainable Transport	The site has access to Hill Road.
AONB and landscape	Views from the AONB of the site might cause harm to the setting of the AONB and would need to be managed.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	This site is relatively unconstrained except for the impact on the setting of the AONB. This can be mitigated with landscaping, but this might reduce the yield. Overall, this site would not make a significant contribution to Chinnor's need.

Site reference	898
Address	Land south of Lower Icknield Way
Site area	11.62 ha (SHELAA)
Planning status	
SHEELA comment	The site is open and free from any development. The site contains grassed areas. Some or all of the site is bounded by fencing, wall or hoarding
Estimated housing yield	189 (SHELAA)
Sustainable Transport	No access to site at present, therefore this would need to be addressed. (SHELAA)
AONB and landscape	Views from the AONB of the site might cause harm to the setting of the AONB and would need to be managed.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1. The site is adjacent to woodland but this does not pose a significant constraint.
Historic Environment	Approximately 10% of the site is within an area of known archaeological interest. SHELAA
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	Overall, this site is accessible by cycle and is large. The site has some constraints that must be overcome such as impact upon the setting of the AONB and management of archaeological remains.

Site reference	901
Address	Land off Crowell Road
Site area	1.79 ha (SHELAA)
Planning status	Appeal dismissed
SHEELA comment	The site is open and free from any development. The site contains grassed areas. There is vegetation present. Some or all of the site is bounded by hedgerows, forestry or other vegetation.
Estimated housing yield	40 (SHELAA)
Sustainable Transport	Access to the B4009.
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1. . Mature tree screening at edge of site would need to be preserved under GP2
Historic Environment	Adjacent to conservation and listed buildings. Approximately 50% of the site is within an area of known archaeological interest. (SHELAA)
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	The site is distant from village amenities and new residents would probably rely upon the car for most journeys. The impact upon the conservation area would need to be managed.

Site reference	959
Address	Land south of Doveleat
Site area	2.54 ha (SHELAA)
Planning status	Appeal withdrawn
SHEELA comment	The site is open and free from any development. The site contains grassed areas. Some or all of the site is bounded by hedgerows, forestry or other vegetation.
Estimated housing yield	57 (SHELAA)
Sustainable Transport	Access could be created using private drives adjacent to the site.
AONB and landscape	Views from the AONB of the site might cause harm to the setting of the AONB and would need to be managed..
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	Adjacent to conservation area and listed buildings. The site is wholly within an area of known archaeological interest.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	A recent planning application was refused because the site was not allocated for housing development and the harm that it would cause to the AONB. This site is one of the most favourable with a good access for new residents to the village centre on foot and cycle though there is no direct access to the public highway. However, there are considerable historic environment constraints that would need to be carefully managed.

Site reference	1004
Address	Chalkpit Lane
Site area	1.01 ha
Planning status	Completion of care home
SHEELA comment	
Estimated housing yield	48 (SHELAA estimate)
Sustainable Transport	The site has access via Kiln Avenue.
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	Not deliverable

Site reference	1066
Address	Land adjoining 54 Lower Icknield Way
Site area	0.55 ha (SHELAA)
Planning status	Refused
SHEELA comment	The site is open and free from any development. Some or all of the site is bounded by fencing, wall or hoarding. Some or all of the site is bounded by development. The site appears maintained.
Estimated housing yield	14 (SHELAA)
Sustainable Transport	Access to Lower Icknield Way
AONB and landscape	Views from the AONB of the site might cause harm to the setting of the AONB and would need to be managed.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	Development of the site might have an adverse impact on the setting of the AONB though it is relatively distant and this should be manageable with careful landscaping. However, the site is not accessible to the village centre and has a relatively low housing yield.

Site reference	1100
Address	Land north of Lower Icknield Way (3)
Site area	1.5 ha (SHELAA)
Planning status	refused
SHEELA comment	The site is largely open, although there is some existing development.
Estimated housing yield	34 (SHELAA)
Sustainable Transport	No existing access to the public highway – this would need to be created via existing private access.
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1. The site might contain a priority habitat and this should be investigated in the event of a planning proposal coming forward. However, it is assumed that the constraint can be managed through a proper mitigation scheme.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	The site has some constraints which should be able to be overcome. However, it is likely to appear incongruous because it would be isolated and disconnected from the built-up area.

Site reference	1175
Address	Land at New Farm
Site area	0.73 ha (SHELAA)
Planning status	Withdrawn
SHEELA comment	The site is largely open, although there is some existing development. The site contains grassed areas. Some or all of the site is bounded by hedgerows, forestry or other vegetation.
Estimated housing yield	18 (SHELAA)
Sustainable Transport	Access to the B4445.
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	The site has no constraints. However, it is likely to appear incongruous because it would be isolated and disconnected from the built up area.

Site reference	1203
Address	Land adjacent to junction at Oakley Lane and Lower Icknield Way
Site area	3.72 ha (SHELAA)
Planning status	
SHEELA comment	Agricultural land currently not in use
Estimated housing yield	84 SHELAA
Sustainable Transport	Access to Oakley Lane
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	This is an unconstrained site, adjacent to the built-up area. Though it is not easily accessible by cycle to the shops and post office, it is accessible by this mode to the local primary school.

Site reference	1204
Address	Land to rear of Middle Farm
Site area	7.95 ha (SHELAA)
Planning status	
SHEELA comment	Open pasture land. Site is part of residential curtilage
Estimated housing yield	110 (SHELAA)
Sustainable Transport	Access to Mill Lane.
AONB and landscape	Development on the site is unlikely to have a negative impact on the landscape or character of the AONB.
Climate Change	31% of site in flood zone 3
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1. . Hedgerow at edge of site would need to be preserved under GP2
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	This is an unconstrained site with the important exception of the partial coverage by Flood Zone 3. It is adjacent to the built-up area. Though it is not easily accessible by cycle to the shops and post office, it is accessible by this mode to the local primary school.

Site reference	1210
Address	Land south of Lower Icknield Way
Site area	3.67 ha (SHELAA)
Planning status	
SHEELA comment	Agricultural land on the edge of a settlement
Estimated housing yield	83 SHELAA
Sustainable Transport	Access to B4009
AONB and landscape	Views from the AONB of the site might cause harm to the setting of the AONB and would need to be managed.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1. . Hedgerow at edge of site would need to be preserved under GP2
Historic Environment	The development is unlikely to have a negative impact on a conservation area or listed building.
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	The site has no constraints though it is visible from the AONB and could have an impact upon its setting. Careful landscaping would therefore probably be required. It is not accessible to schools and the post office. It is likely to appear incongruous because it would be isolated and disconnected from the built up area.

Site reference	1211
Address	Land east of High Street (1)
Site area	
Planning status	
SHEELA comment	Area of open countryside
Estimated housing yield	64 (SHELAA)
Sustainable Transport	There is a private road which has access to High Street
AONB and landscape	Views from the AONB of the site might cause harm to the setting of the AONB and would need to be managed.
Climate Change	The development is unlikely to be at risk of flooding (i.e. in Flood Zone 1).
Green Infrastructure	The development is unlikely to result in the loss of green infrastructure listed in Chinnor NDP policy GP1.
Historic Environment	Within/adjoining conservation area (SHELAA)
Community Facilities	The development is unlikely to result in the loss of community infrastructure.
Cycle-ability score	See assessment in Table 4
Conclusion	This site is relatively unconstrained though views from the AONB and the impact on the conservation area and listed buildings would need to be managed through careful design and landscaping. The site is accessible by cycle.

Appendix 4: additional information supplied by Thames Water

Site ID	Site Name	Net Gain System (l/day)	Net Foul Water Increase to System (l/s)	Net Property Equivalent Increase - Waste	Net Increase in Demand (l/day)	Net Increase in Peak Demand (l/s)	Net Property Equivalent Increase - Water	Water Response	Waste Response
37783	Land East of Crowell Road Chinnor (Approved Reviewed Jan18)	1283	1	120	42000	1.46	120	The water network capacity in this area may be unable to support the demand anticipated from this development.
